

Your demands are our challenges:  
 From now on, the **DA2** tool case trolley  
 is available as standard equipment

Craft working and ergonomics go hand in hand. In order to save the strength of the worker while transporting the devices and also to prevent back and neck pains, the Plarad tool case trolley makes an important contribution to your daily working routine and will be part of the standard equipment of the DA2 battery nutrunner as of January 2021.

Thanks to the strict requirements towards processing, material and design of the IP67 certified sturdy tool case trolley your devices are securely stored and protected against transport damages.

The DA2 tool case trolley inlay is optimally adapted. It provides sufficient and clear storage for the nutrunner, the accessories and your documents.

Your benefits:

- Fast, easy and ergonomic transport of your DA2 battery nutrunner without stressing your back
- Clear and functional arrangement allows fast and easy access to your tools and accessories
